Abstract

This dedication aims to provide an understanding to the Tanjung Atap Village Management Finance Officers Tanjung Batu District of Ogan Ilir Regency on how to manage village funds in achieving good village financial governance. Village Finance is managed on the basis of good governance practices. The Principles of Village Financial Management by Regulation of the Minister of Home Affairs (Permendagri) Number 113 Year 2014 on Village Finance Management are transparent, accountable, participative and conducted in an orderly and disciplined budget. Another common obstacle is that villages do not have procedures and support facilities and infrastructure in the management of their finances and the community has not been critical of the management of revenue and expenditure budget of the village. The amount of funds that must be managed by the village government has a high enough risk in its management, especially for the village government apparatus.

Keywords: Village Officer, Village Finance Management, Regulation of the Minister of Home Affairs (Permendagri) Number 113 Year 2014
